

Write an algorithm which will print all the node number having data parts contain even value.

10 August 2020 20:51

```

Evennode(start)
If start = null
    Print "error"
    Exit
End if
ptr<-start
c<-1
Repeat
    If data-> ptr%2 = 0
        print c
        Exit
    End if
    ptr<-link->ptr
    c<-c+1
    If ptr=null
        exit
    End if
End repeat
End
    
```

Output
2 4 6
